

Tax Rate Making Programs Index

The Clerk's office will analyze the reports from preceding jobs and MIS will run Assessor jobs to create files for New Properties, TIF Diff, and Annex/Disconnect.

***** **After the creation of the files the following jobs are to be ran** *****

- 1) CLRTM51W - Create the vsam Value Work file.**
- 2) CLRTM51X - List agencies not in the Group table.
Change parmusr member(CLRTMGRP) to add new agencies and change the CPI field to the new value.
This info will be supplied by the County Clerk's office.**
- 3) CLRTM51Y - Print the Group table. Give to Clerk's office to verify.,**
- 4) CLRTM53D - Create Adjusted Levy file.**
- 5) CLRTM53I - Calculate Agency tax rates and print report.**
- 6) CLRTM53H - Calculate Tax Rate by town & agency.**

**The County Clerk's office will analyze these reports and my have to make online changes to files and then reproduce the CLRTM53 series reports.
These reports will be faxed to the appropriate agencies for review. 3 RAJ's exist that will help Clerk's office with their analysis.**

- 7) CLRTM35Q - Compare new equalized valuations to prior year values.**
 - 8) CLRTM53Y - Compare new final rates to prior year final rates.**
 - 9) CLRTM53Z - Compare new property values to prior year values.**
- *****

There are 2 files that are produced in the CLRTM53H run. One is called A.CL.RTM.LEVYTXRT which is used to update the agency insert vsam file. The other is called A.CL.RTM.TWNAGYRT which is used to update the EFTS vsam file. It has been found that the agency rate for township records have and incorrect rate on both of these files. They must be corrected before submitting more jobs.

Correction programs have been put in the CLRTM53H job stream that will correct the incorrect rates on these two files that were generated by program CLRTM538.

In the 2005 extension there were 55 incorrect agency rates.

After all the agencies have been faxed their levy breakdown and all are in agreement with the figures the following jobs must be run.

A file called TR.CDD.AGCYBILL is used by the breakdown tax bill print programs to print a shorter agency description on the breakdown bill. The description on TR.CDD.AGCYEFTS is too long and gets truncated by the print programs. Each year new agencies are added to the EFTS file by the County Clerk's office. These agency numbers and descriptions must be given to the Treasurer's department so they can condense the agency description. A report of these new agencies and descriptions will be given to MIS. MIS will use file-aide to delete the current records on A.TR.CDD.AGCYNEW and add the new records out. After this is done submit RAJ TRCDD01C.

- *****
1) **TRCDD01C – Add new agencies to TR.CDD.AGCYBILL vsam file and verify that TR.CDD.AGCYBILL and TR.CDD.AGCYEFTS are in sync.**

***** **THIS MUST BE DONE PRIOR TO THE PRINTING OF THE 2ND *****
